Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the reinforcing element in the form a grommet or reinforcing tape (14', see page 2 of the specification) as recited in claims 44 and 45 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

Art Unit: 3711

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 39, 42-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunsley U.S. Patent 6,748,896 in view of Hassinger U.S. Patent 5,010,667.

Hunsley disclosed an apparatus (10) comprising at least one streamer (26) that can be rolled due to its flexibility; a loose end each streamer coupled to a first end of a launch strip (28); a second end of the launch strip coupled to a right or flexible band (24); a side wrapper (36) as part of the launch strip wherein the ends of the wrapper forms tabs or wings (40) as shown in Fig. 5; the wrapper is composed of various flexible material such as fabric or any equivalent material; a reinforcing element (41) for the launch strip in a form of stitch line or any other suitable means (col. 5, lines 1-15); Fig. 1 shows at least 6 streamers in a row. It is noted that Hunsley failed to teach the use of a means for keeping the apparatus rolled prior to use. However, such feature is very well known in the art as evidenced by Hassinger using a rubber band or the like for keeping a sheet of material in a rolled form prior to use (col. 1, lines 19-27). Therefore, it would have been obvious to one of ordinary skill in the art to modify the streamers of Hunsley with the rubber bands as taught by Hassinger to achieve the predictable result of saving storage space for the streamers.

Regarding claims 50-58, it would have been a matter of design choice to provide any number of steamers with any desired dimensions to accommodate any particular environment.

Allowable Subject Matter

Claims 40 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 39-58 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
